TPT Global Impact Bond Fund

This is one of the investment funds you can choose to invest in

TPT Global Impact Bond Fund Overview

This investment fund invests in the bonds of different companies and governments predominantly from the UK and also around the world.

If companies or governments wish to raise money, they can borrow it from investors for a specific amount of time in return for a set rate of interest. This process is called selling bonds. A bond is effectively an 'IOU' from a company or government. In return for the cash, borrowers usually make regular interest payments before repaying the initial amount borrowed at the end of the agreed term.

Investing in bonds can generally be less risky than other types of investment, such as shares, although the potential rewards are lower. It's important to remember, however, that growth is not guaranteed, and the value of any investment can fall as well as rise and you may not get back the same amount that you initially invested.

What types of funds does it invest in?

Bonds: Loans typically made over a fixed period to governments and companies that entitle the owner to interest followed by a return of the loan amount at the end.

How does it invest?

The Fund invests in corporate bonds in the UK and around the world. The fund employs an index tracking strategy, aiming to replicate the performance of its benchmark. The Fund seeks to improve access to, and the quality of, basic life essentials, reduce inequality and mitigate the effects of climate change.

Bonds are given a rating by an independent rating agency. The higher the rating the more likely the borrower is to repay the interest or loan. Ratings range from AAA, the highest grade, to D, the lowest grade. This Fund invests in a range, but mainly focused on BBB and above.

What are the risks?

Liquidity Risk: The risk of not being able to sell some of your of investments in a timely manner, due to there not being a market willing to buy them from you.

Currency Risk: The risk that changes in exchange rates will affect the value of an overseas investment.

Interest Rate Risk: The risk that changes in market interest rates will cause the value of fixed-interest investments to rise or fall.

Counterparty Risk: The risk of losing money due to one of the parties failing to meet their obligations.

Fund Information as at 30/09/2026

Investment Objective

The Global Impact Bond Fund is actively managed and seeks to understand the world's social and environmental problems and to identify and invest primarily in debt issued by companies and organisations that we believe are addressing these needs in a differentiated way through their core products, services and projects. Through the Fund's investments, we seek to improve access to, and the quality of, basic life essentials, reduce inequality and mitigate the effects of climate change. The Fund seeks to deliver longterm total returns in excess of the Bloomberg Global Aggregate Index (USD Hedged).

Synthetic Risk and Reward Indicator (SRRI) as at 30/09/2026

We have calculated an overall risk rating for this fund to help you to compare the TPT investment choices. We use a popular method called 'SRRI' which may also help you to compare with investments you hold outside of TPT.

What is a risk rating?

- It measures the relative risk and reward of an investment fund, where 1 – being low risk and potentially low returns up to 7 – high risk and potentially high returns
- It's calculated using past performance and volatility. This risk rating is a 'Synthetic Risk and Reward Indicator' (SRRI). The SRRI risk ratings are based on European Security and Markets Authority (ESMA) guidelines.
- The risk rating doesn't guarantee how the fund will perform in the future, and it can change over time.

The risk rating for this fund is **4**

Performance from 24/08/2023 to 30/09/2026

Fund performance figures shown include reinvestment of any income the fund receives with the exclusion of an annuity payment and deduction of the Fund Management Charge, Fund Expenses and where applicable, Property Expense Ratio*. The FMC stated may not be the level of charge which applies to your scheme. Charges and expenses may have changed over time, which is reflected in the performance figures. The Fund performance shown does not take into consideration any additional charges that may apply to your scheme such as administration charges. Fund performance figures for income-paying funds, managed income and future annuity income include the deduction of income taken from the fund.

Benchmark performance shown in our tables and charts is for comparison purposes only and is based on Total Returns, which assumes the reinvestment of any income. The benchmark will not include any costs and charges that apply to the Fund, which could be a reason why the performance of the Fund may not exactly match the performance of the benchmark.

The fund performance figures refer to past performance, which is not a reliable indicator of future performance. You should be aware that the value of investments may fall as well as rise and is not guaranteed. You may get back less than you invest.

Important Information

TPT Retirement Solutions has appointed Standard Life Corporate Investment Solutions to make this Fund available to your pension scheme and to produce this fund factsheet.

Factsheets are updated quarterly and the most up-to-date version can be found in your online account if you're a member. If you're not a member you can access them on our website www.tpt.co.uk. Factsheets provide you with fund information only and is not an invitation to invest or advice about the suitability of an investment for your personal financial situation. If you have any questions or wish to discuss your investment options, you should speak to the Scheme Administrator or Trustee of your pension scheme or seek financial advice.

Fund Pricing

This Fund has a single unit price, which means that on any given date, an investor will purchase units at the same price as an investor selling units. The Fund's unit price is determined by the unit price of the underlying fund(s) in which it invests. Our Fund or the underlying fund's unit price can be impacted by whether money is going in or out of the fund and also the trend of flows in or out.

Data Source

The source of data in our factsheets is FE fundinfo, a specialist investment data provider.

Although Standard Life Corporate Investment Solutions (CIS) takes every care to ensure that the data provided by or to external sources about their own funds is accurate, occasionally discrepancies may occur, for example, due to pricing delays. In all cases Standard Life CIS will endeavour to ensure that these discrepancies are corrected. Standard Life CIS accepts no liability for loss due to such discrepancies, for example where the investor has relied on the information contained in the factsheet to help them make investment decisions.
