TPT Low Carbon Transition Global Equity Fund

This is one of the investment funds you can choose to invest in

TPT Low Carbon Transition Global Equity Fund Overview

This investment fund invests in the shares of different companies around the world.

An equity (or share) is a small stake in a company. If you hold shares in a company, you can be paid dividends (a share in the company's profits). You can also make a profit by selling your shares for a higher price than you paid for them – or lose money by selling at a lower price.

Investing in equities is generally 'riskier' than other types of investments, but the potential reward is greater. The reason being that share prices, both generally and for a single company, can change by a large amount (up or down) in a very short space of time. This Fund aims to balance the risk by investing in a mix of countries and companies rather than investing in one, however the value of any investment can fall as well as rise and you may not get back the same amount that you initially invested.

What types of funds does it invest in?

Equities: Shares or Stocks in companies based around the world which entitles the owner to a share of their future profits.

How does it invest?

The Fund invests in different companies around the world. The fund employs an index tracking strategy, aiming to replicate the performance of its benchmark. The index aims to reduce carbon intensity by 70% relative to the starting universe at the outset and on a path to achieve net zero by 2050 and fossil fuel exposure whilst improving green revenues and delivering dynamic de-carbonisation.

A large portion of this fund invests in developed countries such as countries in North America and Europe. However this Fund may also invest a portion in emerging markets.

What are the risks?

Currency Risk: The risk that changes in exchange rates will affect the value of an overseas investment.

Counterparty Risk: The risk of losing money due to one of the parties failing to meet their obligations.

Reinsurance Risk: The risk of your savings not growing, or falling in value in the event of a failure by an insurance provider.

Emerging Markets Risk: The risk that investments in developing countries may be more volatile than those in developed countries, with the potential for both greater gains and larger losses.

Synthetic Risk and Reward Indicator (SRRI) as at 30/09/2026

We have calculated an overall risk rating for this fund to help you to compare the TPT investment choices. We use a popular method called 'SRRI' which may also help you to compare with investments you hold outside of TPT.

What is a risk rating?

- It measures the relative risk and reward of an investment fund, where 1 – being low risk and potentially low returns up to 7 – high risk and potentially high returns
- It's calculated using past performance and volatility. This risk rating is a 'Synthetic Risk and Reward Indicator' (SRRI). The SRRI risk ratings are based on European Security and Markets Authority (ESMA) guidelines.
- The risk rating doesn't guarantee how the fund will perform in the future, and it can change over time.

The risk rating for this fund is **5**

Environmental, Social and Governance (ESG) Characteristics

TPT has a long-standing commitment to responsible investing. To provide greater insight into the ESG profile of this fund, we've partnered with MSCI, a leading investment research firm, to calculate its ESG rating.

Why an ESG rating?

- The MSCI ESG Fund Rating is designed to measure the Environmental, Social and Governance (ESG) characteristics of a fund's underlying investment holdings.
- The ESG Rating ranges from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).
- The overall fund rating is based on each individual holding's ESG rating, and the proportion held in this fund (and if there is sufficient available data to do so). An individual holding rating aims to measure a company's management of financially relevant ESG risks and opportunities based on their exposure and how well they manage risks relative to peers.

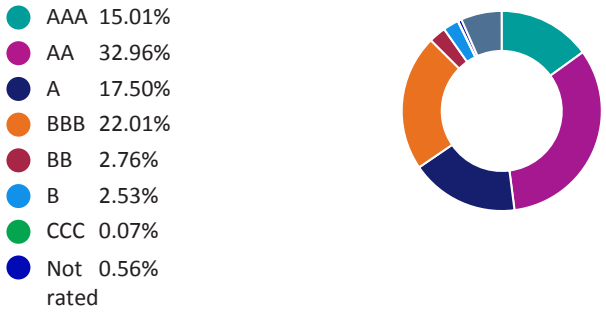

ESG Rating as at 30/09/2026

Performance from 23/08/2023 to 30/09/2026

Fund performance figures shown include reinvestment of any income the fund receives with the exclusion of an annuity payment and deduction of the Fund Management Charge, Fund Expenses and where applicable, Property Expense Ratio*. The FMC stated may not be the level of charge which applies to your scheme. Charges and expenses may have changed over time, which is reflected in the performance figures. The Fund performance shown does not take into consideration any additional charges that may apply to your scheme such as administration charges. Fund performance figures for income-paying funds, managed income and future annuity income include the deduction of income taken from the fund.

Benchmark performance shown in our tables and charts is for comparison purposes only and is based on Total Returns, which assumes the reinvestment of any income. The benchmark will not include any costs and charges that apply to the Fund, which could be a reason why the performance of the Fund may not exactly match the performance of the benchmark.

The fund performance figures refer to past performance, which is not a reliable indicator of future performance. You should be aware that the value of investments may fall as well as rise and is not guaranteed. You may get back less than you invest.

Fund Pricing

This Fund has a single unit price, which means that on any given date, an investor will purchase units at the same price as an investor selling units. The Fund's unit price is determined by the unit price of the underlying fund(s) in which it invests. Our Fund or the underlying fund's unit price can be impacted by whether money is going in or out of the fund and also the trend of flows in or out.

Data Source

The source of data in our factsheets is FE fundinfo, a specialist investment data provider.

Although Standard Life Corporate Investment Solutions (CIS) takes every care to ensure that the data provided by or to external sources about their own funds is accurate, occasionally discrepancies may occur, for example, due to pricing delays. In all cases Standard Life CIS will endeavour to ensure that these discrepancies are corrected. Standard Life CIS accepts no liability for loss due to such discrepancies, for example where the investor has relied on the information contained in the factsheet to help them make investment decisions.
