TPT Islamic Global Equity Index Fund Overview

This investment fund invests in the shares of different companies around the world.

An equity (or share) is a small stake in a company. If you hold shares in a company, you can be paid dividends (a share in the company's profits). You can also make a profit by selling your shares for a higher price than you paid for them – or lose money by selling at a lower price.

Investing in equities is generally 'riskier' than other types of investments, but the potential reward is greater. The reason being that share prices, both generally and for a single company, can change by a large amount (up or down) in a very short space of time. This Fund will invest in equities which meet Islamic investment principles, of companies in the Shariah Compliant Index. Investing in equities entails different levels of risk and reward, the value of any investment can fall as well as rise and you may not get back the same amount that you initially invested.
