TPT Ethical Global Equity Fund Overview

This investment fund invests in the shares of different companies and countries around the world which meet a variety of environmental, social and governance criteria.

The Fund does not invest in companies that do not meet the agreed guidelines. It will invest in the shares of many companies at the same time. This helps to even out the effect of any changes in share prices, making investment in the fund less risky than investing in any individual company's shares. However, the value of any investment can fall as well as rise and you may not get back the same amount that you initially invested.

The investment manager uses their expertise to minimise the costs associated with buying and selling shares.

An option designed for someone who wants to focus their investments on ethical investing.

What types of funds does it invest in?

Equities: Shares or Stocks in companies based in the UK and around the world which entitles the owner to a share of their future profits.

How does it invest?

The Fund invests in many different types of companies within different sectors. A large portion is invested in companies within the technology and financial sector. The Fund will tend to avoid sectors that do not meet the required criteria, for example weapons and tobacco industries.

The majority (around 50%) of investments are in the USA, with the rest spread around the world, including the UK, Europe and Japan.

What are the risks?

Market Risk: The risk that the value of your investments will fluctuate due to general newsflow. This could include updated economic data, geopolitical changes and natural disasters, amongst other events.

Reinsurance Risk: The risk of your savings not growing, or falling in value in the event of a failure by an insurance provider.

Currency Risk: The risk that changes in exchange rates will affect the value of an overseas investment.

Counterparty Risk: The risk of losing money due to one of the parties failing to meet their obligations.

Fund performance figures shown include reinvestment of any income the fund receives with the exclusion of an annuity payment and deduction of the Fund Management Charge, Fund Expenses and where applicable, Property Expense Ratio*. The FMC stated may not be the level of charge which applies to your scheme. Charges and expenses may have changed over time, which is reflected in the performance figures. The Fund performance shown does not take into consideration any additional charges that may apply to your scheme such as administration charges. Fund performance figures for income-paying funds, managed income and future annuity income include the deduction of income taken from the fund.

Benchmark performance shown in our tables and charts is for comparison purposes only and is based on Total Returns, which assumes the reinvestment of any income. The benchmark will not include any costs and charges that apply to the Fund, which could be a reason why the performance of the Fund may not exactly match the performance of the benchmark.

The fund performance figures refer to past performance, which is not a reliable indicator of future performance. You should be aware that the value of investments may fall as well as rise and is not guaranteed. You may get back less than you invest.
