

TPT Ethical Global Equity Fund

This is one of the investment funds you can choose to invest in

TPT Ethical Global Equity Fund Overview

This investment fund invests in the shares of different companies and countries around the world which meet a variety of environmental, social and governance criteria.

The Fund does not invest in companies that do not meet the agreed guidelines. It will invest in the shares of many companies at the same time. This helps to even out the effect of any changes in share prices, making investment in the fund less risky than investing in any individual company's shares. However, the value of any investment can fall as well as rise and you may not get back the same amount that you initially invested.

The investment manager uses their expertise to minimise the costs associated with buying and selling shares.

An option designed for someone who wants to focus their investments on ethical investing.

What types of funds does it invest in?

Equities: Shares or Stocks in companies based in the UK and around the world which entitles the owner to a share of their future profits.

How does it invest?

The Fund invests in many different types of companies within different sectors. A large portion is invested in companies within the technology and financial sector. The Fund will tend to avoid sectors that do not meet the required criteria, for example weapons and tobacco industries.

The majority (around 50%) of investments are in the USA, with the rest spread around the world, including the UK, Europe and Japan.

What are the risks?

Currency Risk: The risk of some of your investments falling in value due to the currency the investments are in, decreases in value versus the pound.

Counterparty Risk: The risk of losing money due to one of the parties failing to meet their obligations.

Reinsurance Risk: The risk of your savings not growing, or falling in value in the event of a failure by an insurance provider.

What currency does this fund trade in?

Even though it's a global fund, it trades in GBP.
